DATE MAILED: 10/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

AKC

Office Action Summary	Application No. 10/781,571	Applicant(s) DOLJACK ET AL.	
	Examiner Nguyen T Ha	Art Unit 2831	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 and 20-32 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 and 20-32 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-12 and 20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-12 and 20-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Thrap (US 6,806,686).

Regarding claim 1, Thrap discloses a module having inductor-free circuitry for controlling voltage imbalances between a pair of capacitors connected in a series arrangement (figure 2), comprising:

- a first terminal configured for connection to a positive plate of the first capacitor (14);
- a second terminal configured for connection to a negative plate of the first capacitor and to a positive plate of the second capacitor (12) (figure 2);
- a third terminal configured for connection to a negative plate of the second capacitor (figure 2); and

- an active element (34) integrated within the inductor-free circuitry between the first second, and third terminals and adapted to substantially balance the voltage imbalances between the pair of capacitors the active element having power connections to the first and third terminals (figure 2).

Regarding claim 2, Thrap discloses the active element is an op amp (34), the op amp having an input, an output, and a feedback loop, the input being connected to two voltage dividing resistors (42 & 44).

Regarding claim 3, Thrap discloses the output is connected to the second terminal (figure 2).

Regarding claim 4, Thrap discloses the output is connected to the second terminal through a current limiting resistor (figure 2).

Regarding claim 5, Thrap discloses the feedback loop includes a feedback resistor (figure 3).

Regarding claim 6, Thrap discloses (figure 4) having the active element is a switched voltage converter.

Regarding claim 7, Thrap discloses (figure 4) having the switched voltage converter incorporates a flying capacitor.

Regarding claim 8, Thrap discloses the at least one of the terminals is further configured for connection to a second module having inductor-free circuitry for controlling voltage imbalances between a second pair of capacitors connected in the series arrangement (figure 4).

Regarding claim 9, Thrapp discloses the first and second module's inductor-free circuitries are substantially identical (figure 3).

Regarding claim 10, Thrapp discloses the first and second module's circuitry overlap upon connection to the second module (figure 3).

Regarding claim 11, Thrapp discloses the first and second module's circuitry overlap at one of the terminals (figure 3).

Regarding claim 12, Thrapp discloses the first and second modules' circuitry overlap cross a common capacitor shared by the two pair of capacitors (figure 3).

Regarding claims 20-32, the method steps are necessitated by the device structure as it is disclosed by Thrapp (figures 2-4) comprising:

- forming a first terminal configured for connection to a positive plate of the first capacitor (14);
- forming a second terminal configured for connection to a negative plate of the first capacitor and to a positive plate of the second capacitor (12, figure 2);
- forming a third terminal configured for connection to a negative plate of the second capacitor (figure 2); and
- integrated an active element (34) within the inductor-free circuitry between the first second, and third terminals and adapted to substantially balance the voltage imbalances between the pair of capacitors the active element having power connections to the first and third terminals (figure 2).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen T. Ha whose telephone number is 571-272-1974. The examiner can normally be reached on Monday-Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean Reichard can be reached on 571-272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
